Professional Summary

Full Stack Developer with professional and independent project experience building web and mobile applications, REST APIs, and relational databases. My core stack includes TypeScript, React, Next.js, Node.js/NestJS, .NET 8/C#, PostgreSQL, and Flutter. I have built multi-vendor e-commerce and business operations management platforms, from the data model to role-based interfaces and deployment on Microsoft Azure. I integrate and manage Microsoft Azure services (servers and virtual machines, PostgreSQL databases, storage, monitoring and analytics, translation, and AI with Azure OpenAI) and third-party APIs to connect systems and automate processes.

Work Experience

Mid-Level Full Stack Developer · Luhos

`OCT 2025 – PRESENT · FULL-TIME EMPLOYEE`

Platform that centralizes the management of hospitality and property services: cleaning, maintenance, and scooter management.

- Developed role-based operational workflows for administrators and workers in React (web) and Flutter (mobile): prioritized cleaning tasks, assignments, schedules, checklists, and urgent reports.
- Implemented the API in .NET 8 and ASP.NET Core with Entity Framework Core, PostgreSQL, and JWT/Identity authentication, and integrated Guesty via OAuth and its API.
- Built maintenance tracking with GPS proximity validation and Leaflet/OpenStreetMap maps, plus scooter inventory, delivery, and pickup with photos, digital signatures, and damage assessment.
- Designed an internal assistant with Azure OpenAI grounded in approved knowledge, with read-only tools over Luhos and Guesty data and audit logging.
- Automated deployments with GitHub Actions to Azure App Service and Azure Static Web Apps, releasing to production only through version tags; managed servers and Azure Blob Storage, and resolved platform incidents.
- Designed the branching and release flow (feature → develop → staging → main) across the product's four repositories, with a staging environment ahead of production.

Technologies: `React 18` `TypeScript` `Vite` `Zustand` `Tailwind CSS` `Flutter` `Dart` `Riverpod` `Firebase Messaging` `.NET 8` `ASP.NET Core` `C#` `Entity Framework Core` `PostgreSQL` `JWT/Identity` `Hangfire` `Azure OpenAI` `Azure Blob Storage` `Guesty API` `Leaflet/OpenStreetMap` `Microsoft Azure` `Azure App Service` `Azure Static Web Apps` `GitHub Actions` `xUnit` `Moq` `Jest` `Flutter Test`.

Full Stack Developer · Tanku

`JAN 2025 – OCT 2025 · PART-TIME EMPLOYEE`

Multi-vendor platform that combines e-commerce, real-time communication, and social features.

- Developed seller, seller application, order, and inventory modules on Medusa v2 with TypeScript, PostgreSQL, and MikroORM.
- Implemented product import from Excel files.
- Built real-time chat with Socket.IO, including presence, typing indicators, and chat rooms.
- Developed social features for friendships, wishlists, and gifts with Next.js and React.

Technologies: `Medusa v2` `TypeScript` `PostgreSQL` `MikroORM` `Next.js` `React` `Socket.IO`.

Full Stack Developer · Gudfy

`JUL 2023 – SEP 2025 · FULL-TIME EMPLOYEE`

Multi-vendor e-commerce for digital products, with purchase of and access to codes from the buyer's account.

- Developed the buyer, seller, and admin interfaces, from the catalog and cart to orders and access to purchased codes.
- Designed the PostgreSQL relational model, implemented persistence with TypeORM, and optimized queries.
- Implemented the cart with stock checks when each order is created and a dynamic catalog that ranks serialized variants by sales.
- Built the seller dashboard for code inventory, orders, wallet, and withdrawal requests, along with seller applications and reviewed product requests.
- Integrated the transactional email flow that sends codes to the buyer after payment is confirmed for orders with preloaded codes.

Technologies: `Medusa v1` `TypeScript` `Next.js` `React` `REST APIs` `PostgreSQL` `TypeORM`.

Personal Projects

Ocho80 · Digital raffles and bingo

- Developed the backend with NestJS, Prisma, and PostgreSQL, the admin panel with React/Vite, and the participant app with Flutter.
- Implemented the full raffle flow: event publishing, number reservation, multipart upload of payment receipts, manual approval or rejection, and automatic release of expired reservations.
- Built real-time bingo with Socket.IO: drawn balls, chat, cards, and winning-pattern detection.

- **Radio Navidad** — web radio site with a live player, programming schedule, Bible verses, and carousel management — Next.js, TypeScript, Tailwind CSS, Framer Motion.
- **Container Calculator** — cargo distribution app with box, layer, pallet, capacity, and weight calculations, and front, side, top, and isometric SVG views — Expo, React Native, SVG.
- **Libres en Cristo Jesús** — congregation management system with member registration, roles, QR-based attendance, Excel exports, and QR codes in PDF — NestJS, Next.js, PostgreSQL, TypeORM.

Technical Skills

Languages: `TypeScript` `JavaScript` `C#` `Dart` `SQL`.

Frontend: `React` `Next.js` `Vite` `Zustand` `Tailwind CSS` `Framer Motion`.

Mobile: `Flutter` `Riverpod` `React Native` `Expo`.

Backend & APIs: `Node.js` `NestJS` `Medusa` `.NET 8` `ASP.NET Core` `REST APIs` `Socket.IO` `Hangfire`.

Databases & ORMs: `PostgreSQL` `TypeORM` `MikroORM` `Prisma` `Entity Framework Core`.

Applied AI: `Azure OpenAI` `LLM integration` `knowledge retrieval` `read-only tools` `audit logging`.

Cloud & Tools: `Microsoft Azure` `Azure App Service` `Azure Static Web Apps` `Azure Virtual Machines` `Azure Virtual Network` `Azure Database for PostgreSQL` `Azure Blob Storage` `Application Insights` `Log Analytics` `Firebase Messaging` `Git` `GitHub` `GitHub Actions (CI/CD)`.

Security: `JWT` `ASP.NET Identity` `role-based access control`.

Testing: `Jest` `xUnit` `Moq` `Flutter Test`.

Methodologies: `Scrum` `modular architecture` `database migrations`.

Education

B.S. in Systems Engineering — Universidad de Cundinamarca — Graduated

Full Stack Development coursework — Platzi — Next.js, JavaScript, TypeScript, TypeORM, and PostgreSQL

Coursework in basic video game programming with Unity 3D — SENA

Languages

Spanish — Native · **English** — B2 (technical reading)
